LANE SELECTION RULES

ITEM	PROVEN SOURCE / MECHANISM	REQUIRED OUTCOME
[lane-a]-vN	Primary project-specific concern	Narrow, durable branch token.
[lane-b]-vN	Second project-specific concern	Independent concern that can validate itself.
ai-vN	Umbrella for agents + skills + plugins	Use only when multiple AI-facing artifact classes belong together.
tools / code / docs / utils	Examples, not fixed names	Choose the narrowest stable project term.

EVIDENCE / COMPATIBILITY

LANE	VALIDATION	RESULT
SPEC	schema / lint / contract consistency	Normative behavior coherent.
[LANE-A]	project-specific tests/build checks	Primary deliverable proves itself.
[LANE-B]	project-specific coverage/validation	Second lane proves itself.
MEMORY	glossary / link / recall-map checks	Recall aids stay aligned and non-normative.
