

[PROJECT / PRODUCT] / FOUR-SQUARE CONSTITUTIONAL LETTERHEAD	[PROJECT VERSION] Four-Square Template v1.4
---	---

PROJECT CONSTITUTION / CONTRACT / LETTERHEAD

FOUR-SQUARE RELEASE LINEAGE

main1 = repository first commit / immutable root reference

SPEC spec-v1.2	[LANE-A] [lane-a]-v1.2	[LANE-B] [lane-b]-v1.2	MEMORY memory-v1.2
--------------------------	----------------------------------	----------------------------------	------------------------------

SPEC and MEMORY are fixed. The two middle lanes are project-defined and **SHOULD** remain stable across versions.

CONSTITUTIONAL LANGUAGE

MUST / MUST NOT binding law	SHALL / SHALL NOT constitutional alias	SHOULD / SHOULD NOT strong guidance	MAY permitted option	EXCEPTION / WAIVER explicit departure
MISSION [MISSION]	CORE PRINCIPLE [CORE PRINCIPLE]		BOUNDARY [BOUNDARY / OUT OF SCOPE]	

CONSTITUTIONAL HIERARCHY / FORMS

CONSTITUTION → ARTICLES / LAWS → CONTRACTS → POLICIES → GUARDRAILS → RECOMMENDED PRACTICES → CHECKLISTS

The form label does not determine force; the normative keyword does.

ARTICLES / LAWS / CONTRACTS / GUARDRAILS

ID	FORM	FORCE	CLAUSE
LAW-TRACE-001	LAW	MUST	Material binding clauses MUST carry stable FORM-SCOPE-NNN identifiers and SHOULD map to observable evidence.
LAW-VERSION-001	LAW	MUST NOT	FSL template version and governed project version MUST NOT be conflated.
LAW-PROOF-001	LAW	MUST NOT	A conformance claim MUST NOT be generalized beyond the scope and environment actually proven.
LAW-SNAPSHOT-001	CONTRACT	MUST	An accepted Four-Square release MUST record the exact reviewed commits for SPEC, lane A, lane B and MEMORY.
LAW-MEMORY-001	LAW	MUST NOT	MEMORY MUST NOT create or amend law unless promoted into SPEC. MEMORY may remember law; MEMORY cannot make law.

CONFORMANCE / EXCEPTION DECLARATION

CONFORMANT	CONFORMANT WITH EXCEPTION	NON-CONFORMANT	NOT YET PROVEN
-------------------	----------------------------------	-----------------------	-----------------------

A **MUST** / **MUST NOT** deviation **MUST** be visible. An **EXCEPTION** / **WAIVER MUST** identify clause ID, scope, owner, rationale, evidence and review/expiry condition where applicable.

RELEASE LAW

Draft ≠ Tested ≠ Accepted ≠ Released. Claims **MUST** be scoped to evidence actually validated. An accepted release **MUST** record the exact four reviewed lane commits. The snapshot **MUST NOT** replace Git. TOUCH EVERYTHING REQUIRED; COMPLETE LITTLE; GROW WHAT IS PROVEN. One version, four squares, all green.

Four-Square Template v1.4 SPEC + MEMORY fixed	MUST / SHOULD / MAY force is explicit	main1 = immutable root main = accepted integration
--	---	---

PAGE 2 — GOVERNANCE / DEVELOPMENT / EXCEPTIONS

Use when project complexity requires more than the one-page constitutional identity.

ARTICLES / LAWS / CONTRACTS / GUARDRAILS

ID	FORM	FORCE	CLAUSE
LAW-TRACE-001	LAW	MUST	Material binding clauses MUST carry stable FORM-SCOPE-NNN identifiers and SHOULD map to observable evidence.
LAW-VERSION-001	LAW	MUST NOT	FSL template version and governed project version MUST NOT be conflated.
LAW-PROOF-001	LAW	MUST NOT	A conformance claim MUST NOT be generalized beyond the scope and environment actually proven.
LAW-SNAPSHOT-001	CONTRACT	MUST	An accepted Four-Square release MUST record the exact reviewed commits for SPEC, lane A, lane B and MEMORY.
LAW-MEMORY-001	LAW	MUST NOT	MEMORY MUST NOT create or amend law unless promoted into SPEC. MEMORY may remember law; MEMORY cannot make law.

DEVELOPMENT GOVERNANCE — RECOMMENDED CHECKLIST

- ☐ Every material iteration **MUST** declare STRATEGY and TOUCHPOINT SET.
- ☐ Every declared touchpoint **MUST** be exercised meaningfully for the claimed path; implementation at a touchpoint **MAY** be intentionally tiny.
- ☐ Strategy **MAY** be E2E, E2M, M2E, PARALLEL E2E, MEET-IN-THE-MIDDLE or INCREMENTAL E2E; START / MIDPOINT / END **MUST** be named where applicable.
- ☐ A component test **MUST NOT** be represented as E2E proof, and an E2E claim **MUST NOT** bypass any touchpoint declared in its Touchpoint Set.
- ☐ Important implementation material **SHOULD** be recorded as TECHNOLOGY / LIBRARY / REFERENCE / LINK with FORCE, RELATION, PURPOSE and SOURCE; REUSE / INHERIT / REFERENCE **SHOULD** be explicit where assumptions could leak.

EXCEPTION / WAIVER PROTOCOL

CLAUSE	SCOPE	OWNER	RATIONALE	EVIDENCE	REVIEW / EXPIRY
[REQUIRED]	[REQUIRED]	[REQUIRED]	[REQUIRED]	[REQUIRED]	[REQUIRED]

CONFORMANCE / EXCEPTION DECLARATION

CONFORMANT	CONFORMANT WITH EXCEPTION	NON-CONFORMANT	NOT YET PROVEN
------------	---------------------------	----------------	----------------

A **MUST** / **MUST NOT** deviation **MUST** be visible. An **EXCEPTION** / **WAIVER MUST** identify clause ID, scope, owner, rationale, evidence and review/expiry condition where applicable.

RELEASE LAW

Draft ≠ Tested ≠ Accepted ≠ Released. Claims **MUST** be scoped to evidence actually validated. An accepted release **MUST** record the exact four reviewed lane commits. The snapshot **MUST NOT** replace Git. TOUCH EVERYTHING REQUIRED; COMPLETE LITTLE; GROW WHAT IS PROVEN. One version, four squares, all green.
